CARPOOL PARKING LOT INVENTORY - NOVEMBER 1986

The annual inventory of carpool parking activity was conducted in November and December. The inventory surveyed parking areas for the following: signs, facilities and vehicle counts.

RESULTS

TOTAL NUMBER OF OFFICIAL MTC PARKING LOTS: 44

TOTAL NUMBER OF PARKING SPACES: 2795

TOTAL NUMBER OF VEHICLES PARKED: 1615

AVERAGE OVERALL OCCUPANCY: 58%

In the year since the last inventory, MTC has opened three carpool parking lots and made improvements to several other lots. The total number of parking spaces increased by 7.5%. The number of vehicles parked increased by 14.3%. Overall vehicle occupancy increased by 6.3%. Thirteen lots had an occupancy rate of 70 per cent or more. One lot was over capacity.

As part of the inventory, many other sites were checked for carpool parking activity. Twenty-one sites with carpool activity are identified in the inventory. A total of 255 vehicles were parked at these sites.

Two carpool lots established by municipalities were surveyed.

BENEFITS**

The 1615 vehicles parked in official MTC parking lots:

*SAVE ENERGY - 4,574,000 L of gasoline annually.

*REDUCE CONGESTION - reduced annual vehicle kilometres travelled by 38,114,000 (during the peak hours).

*IMPROVE SAFETY - around intersections; vehicles are no longer parked along interchange ramps.

These figures represent only the savings generated by daytime users of the parking lots during a normal work week. Further savings are generated by the many weekend and evening users of the lots, who carpool perhaps for shopping or recreational purposes.

The 2795 parking spaces provide a safe, convenient and highly visible service to the public.

**Assumptions
- Average distance from lot to work 47.2 km
- Fuel efficiency of vehicles 12 L/100 km
- 250 working days per year.
